

**REMARKS**

The accompanying new set of drawings includes original Figure 2 and Figures 1, 3 and 4, which were inadvertently omitted from the filed application on November 5, 2003. Each of these Figures 1, 3 and 4 were described in the November 5, 2003 filed specification and, thus, no new matter is constituted by these drawings. Without these drawings, the only possible objection to the specification would be that the elements described in the specification must be shown in the drawings. The above-submission anticipates that objection.

Additionally, as an indication of priority of German patent Application 102 51 833.5-32, filed on November 7, 2002, Applicants submit that the drawings of Figures 1-4, including Figures 1, 3 and 4, are identical to the German application for which priority is claimed.

Therefore, Applicants respectfully request a full and thorough examination on the merits of this application.

If there are any questions regarding this amendment or the application in general, a telephone call to the undersigned would be appreciated since this should expedite the prosecution of the application for all concerned.

If necessary to effect a timely response, this paper should be considered as a petition for an Extension of Time sufficient to effect a timely response, and
